1. BACKGROUND INFORMATION

1.1. INTRODUCTION

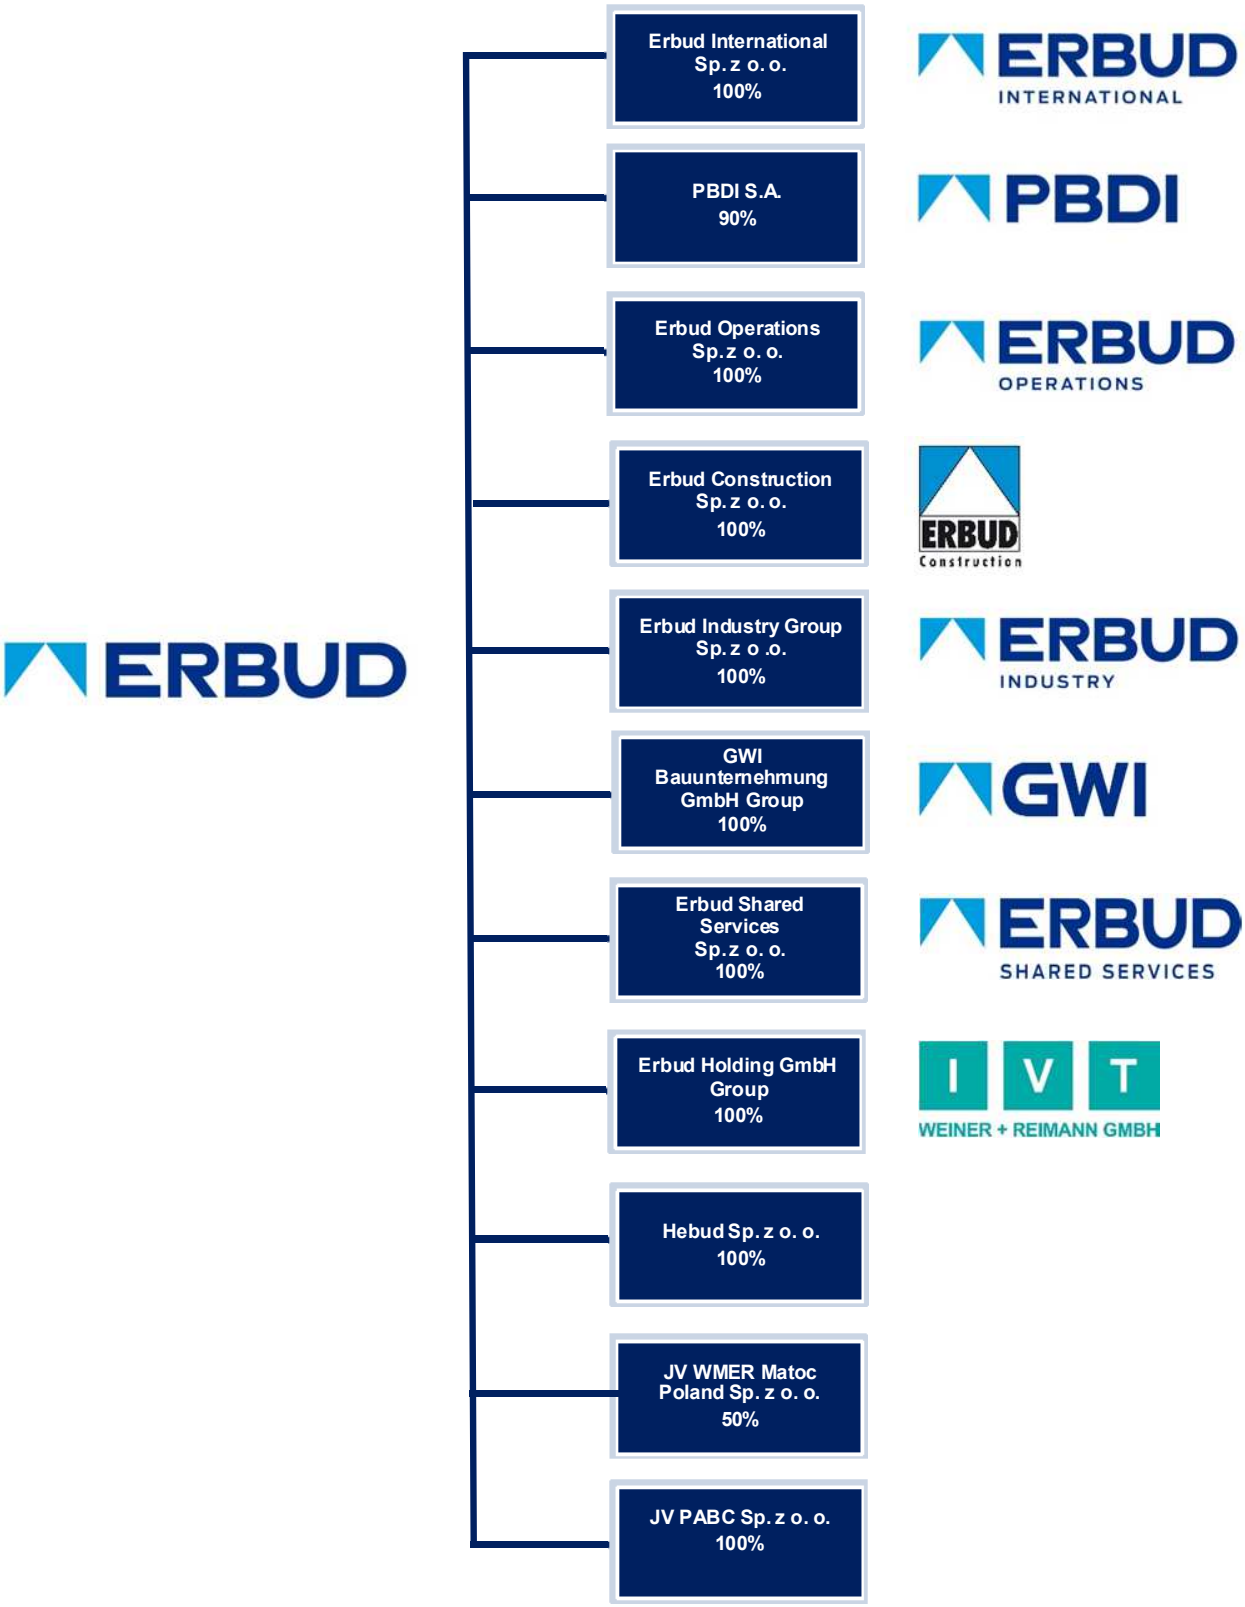

Erbud S.A. is a joint-stock company established following the transformation from Erbud into a limited liability company, registered on 29 November 2006 by the District Court for the Capital City of Warsaw in Warsaw, 13th Commercial Division of the National Court Register, under No. 0000268667, with its registered office at ul. Franciszka Klimczaka 1.

Erbud Spółka z o.o. was established on 28 August 1990 and entered into the National Court Register on 8 August 2001, under entry No. 0000034299.

The Company's core business are general civil engineering services concerning building construction (PKD 4521A).

The Company is the Parent Company in the Erbud S.A. Capital Group and draws up consolidated financial statements of the Erbud S.A. Group.

1. BACKGROUND INFORMATION

Detailed organisational structure of the Group is presented in the Note 6.4.

1.2. GROUNDS FOR DRAWING UP THE FINANCIAL STATEMENT

IFRS Compliance Statement

The Company's financial statement has been draw up in accordance with the International Financial Reporting Standards ("IFRS 34"), endorsed by the European Union, and were effective as of 30 September 2020.

The Separate Financial Statement is presented in Polish currency (Polish zloty, "PLN"), and all values are specified in thousands of Polish zlotys.

The Financial Statement has been drawn up on historical cost basis, except for financial derivatives that were priced at fair value.

This Financial Statement was approved for publication by the Management Board on 6 November 2020.

Going Concern

This Separate Financial Statement has been drawn up following going concern principle applicable to the Company in the foreseeable future. As of the date of approval of this Financial Statement, no signs prevailed indicating a risk to the continuation of Company operations following a going concern principle.

Pricing at fair value

The measure of fair value of an asset or liability the Company takes into consideration the properties of a certain asset or liability, if the market players take into consideration these characteristics when measuring the assets or liabilities at the measurement date. The Company classifies fair value measurement principles using the fair value hierarchy, reflecting the weight of source data used for measurement, pursuant to IFRS No. 13.

Conversion of items into foreign currencies

The items specified in the financial statements are measured in the currency of the core business environment where the entity carries out its operations ("functional currency"). The functional currency of the Company and the currency used for the presentation of the financial statement is the Polish zloty (PLN)

Transactions in foreign currencies are carried in the books at their nominal value converted into PLN using the average rate of the National Bank of Poland. At the moment of realisation the foreign exchange gains or losses they are posted as financial gains or expenses.

At the balancing date cash assets and liabilities denominated in currencies other than Polish zloty are converted into Polish zlotys using the appropriate average exchange rate, effective at the end of the accounting period, determine for a certain currency by the National Bank of Poland.

The foreign exchange gains/losses are posted respectively into the line "financial gains (losses)" or in cases defined by accounting principles (policy), are capitalised in the assets value. The non-cash assets and liabilities recognised at historic cost expressed in foreign currency are posted at historical exchange rate prevailing at the transaction date. Non-cash assets and liabilities are carried at fair value expressed in foreign currency are converted using the exchange rate prevailing at the date of fair value measurement.

1.3. THE APPLICATION OF NEW AND AMENDED STANDARDS, AND THEIR INTERPRETATIONS:

In this Separate Financial Statement, the following new and amended standards and their interpretations were applied for the first time, which entered into force on 1 January 2020:

a) IFRS 3 "Business Combinations"

As a result of the amendment to IFRS 3 "Business Combinations", the definition of "business" was modified. The current definition has been narrowed down and is likely to result in more acquisitions being qualified as asset acquisitions.

The above changes to the standard did not affect the Company's financial statements draw up as of 30 September 2020.

b) • Amendments to IFRS 9, IAS 39 and IFRS 7 connected with the IBOR reform

Amendments to IFRS 9, IAS 39 and IFRS 7 published in 2019 modify some of the detailed requirements for hedge accounting, mainly to ensure that the expected reform of reference rates (the IBOR reform) does not generally result in the termination of hedge accounting.

The above changes to the standard did not affect the Company's financial statements draw up as of 30 September 2020.

c) IAS 1 "Presentation of Financial Statements" and IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors"

The Council has published a new definition of the term 'materiality'. The amendments to IAS 1 and IAS 8 clarify the definition of materiality and increase consistency between the standards, but are not expected to have a significant impact on the drawing up the financial statements.

d) Amendments to the scope of IFRS Conceptual Assumptions

In 2019, amendments to the IFRS Conceptual Assumptions were published, which are effective from 1 January 2020. The revised Conceptual Assumptions are used by the Board and the Interpretation Committee when working on new standards. Nevertheless, the entities drawing up the financial statements may use the Conceptual Framework to develop accounting policies for transactions not regulated by the current IFRS.

Published standards and interpretations, which are not yet effective and have not been applied by the Company before.

In these separate financial statements the Company has not decided to apply the following published standards, interpretations or amendments to existing standards before their effective date:

a) IFRS 17 „Insurance Contracts" and amendments to IFRS 17

The IFRS 17 "Insurance Contracts" was issued by the International Accounting Standards Board on 18 May 2017 and amendments to IFRS 17 were published on 25 June 2020. The new amended standard is effective for annual periods beginning on or after 1 January 2023.

The new IFRS 17 "Insurance Contracts" will replace the current IFRS 4, which permits a variety of practices in the settlement of insurance contracts. IFRS 17 will change fundamentally the accounting of all entities that deal with insurance and investment contracts.

At the date of preparation of these separate financial statements, the new standard had not yet been endorsed by the European Union.

b) Amendments to IAS 1 "Presentation of Financial Statements"

The Council has published amendments to IAS 1 that clarify the issue of presentation of liabilities as long and short-term ones. The published amendments shall apply to financial statements for periods beginning on or after 1 January 2022.

At the date of preparation of these separate financial statements, the amendment in question had not yet been endorsed by the European Union.

c) Amendments to IFRS 3 "Business Combinations"

The published amendments to the standard are intended to update the relevant references to the Conceptual Assumptions in IFRS, without making material changes to business combinations accounting. At the date of preparation of these separate financial statements, the amendment in question had not yet been endorsed by the European Union.

d) Amendments to IAS 16 "Property, Plant and Equipment"

The amendment introduces a ban on adjusting the cost of production of property, plant and equipment by the amounts obtained from the sale of components produced during the period of preparation of the property, plant and equipment for operation in accordance with the management's intentions. Instead, the entity will recognise the above sales revenues and related costs directly in the income statement. The amendment shall apply to financial statements for periods beginning on or after 1 January 2022. At the date of preparation of these separate financial statements, the amendment in question had not yet been endorsed by the European Union.

e) Amendments to IAS 37 "Provisions, contingent liabilities and contingent assets"

The amendments to IAS 37 provide an explanation of the costs that an entity takes into account when analysing whether a contract is an onerous contract. The amendment shall apply to financial statements for periods beginning on or after 1 January 2022. At the date of preparation of these separate financial statements, the amendment in question had not yet been endorsed by the European Union.

f) Annual Amendments to IFRS 2018 - 2020

"The annual revision of IFRS 2018-2020 introduces changes to the standards: IFRS 1 "First-time Adoption of International Financial Reporting Standards", IFRS 9 "Financial Instruments", IAS 41 "Agriculture" and the illustrative examples for IFRS 16 "Lease".

The amendments contain clarifications and describe more precisely the guidelines for standards on recognition and measurement. At the date of preparation of these separate financial statements, the amendments in question had not yet been endorsed by the European Union.

g) Amendments to IFRS 16 "Lease"

On 28 May 2020 the Council published an amendment to IFRS 16 in response to amendments to the lease contracts in connection with the coronavirus pandemic (COVID-19). Lessees have the right to take advantage of discounts and exemptions, which may take various forms, i.e. deferral or exemption from lease payments. Therefore, the Council has introduced a simplification in assessing whether these amendments represent modification of the lease. Lessees may benefit from the simplification of not applying the guidelines of IFRS 16 on modification of lease contracts. As a result, this will result in the recognition of lease allowances and exemptions as variable lease payments over the period in which the event or condition causing payment decrease occurs. The amendment has been in force since 1 June 2020, but it has not yet been endorsed by the European Union.

h) Amendment to IFRS 4: Application of IFRS 9 "Financial Instruments"

The amendment to IFRS 4 "Insurance Contracts" postpones the application of IFRS 9 "Financial Instruments" until 2021. At the date of preparation of these separate financial statements, the amendment had not yet been endorsed by the European Union.

i) IFRS 14 "Regulatory Deferral Accounts"

This standard allows entities that drawn up financial statements for the first time (on or after 1 January 2016) pursuant to IFRS to recognize amounts resulting from operations with regulated prices, in compliance with the previously applied accounting principles. To enhance comparability with entities that already apply IFRS and do not post such amounts, under published IFRS 14, amounts resulting from operations with regulated prices should be presented separately in both the statement of financial position, in the profit and loss account and the statement of other comprehensive income.

IFRS 14 will not be endorsed by virtue of the European Union's decision.

j) Amendments to IFRS 10 and IAS 28 regarding the sale or contribution of assets between the investor and its associates or joint ventures

The amendments solve the problem of the current inconsistency between IFRS 10 and IAS 28. Accounting recognition depends on whether non-monetary assets sold or contributed to an associate or joint venture are businesses or not.

Where a non-monetary asset is a 'business', the investor will show a full gain or loss from the transaction. If the assets do not meet the business definition criteria, the investor recognises a gain or loss excluding the portion that represents the interest of other investors.

The amendments were published on 11 September 2014. As of the date of drawing up these separate financial statements, the endorsement of this amendment is deferred by the European Union.

2. BUILDING CONTRACTS

The Company signs fixed-price contracts for the execution of construction contracts, mainly in the areas of apartment construction (including entire housing estates), hotels, SPA facilities, shopping malls, wind farms, power plants, production rooms, and highways.

Revenues and expenses on account of performed construction contracts are recognized by the Company in time as the progress of works is made. The Company measures contract performance progress rate using the performance-based method, i.e. it determines the value of revenues and expenses under the performance of construction contracts in the period from the Contract Date to the balancing date proportionally to the progress rate of a certain contract performance by way of evaluation of the achieved results and milestones. From thus determined figures the Group deducts revenues and expenses, which affected the financial result in previous years, generating revenues and costs under building contracts executed in the current period.

On the other side, the pricing results (i.e. the determination of revenues and costs using the progress rate method) are recognized as "Receivables (or Liabilities) Under Building Contracts - Pricing".

The works performed under building contracts are invoiced in adherence to the schedule set forth in the contract. The Company recognizes invoiced revenue in the line "Trade receivables and other receivables" (Note 6.1) The Contractors under building contracts signed with the Group retain part of the payments as contract performance bond. These figures are recognized as "Building contract receivables - bid bonds" and are refundable most often after project completion after the end of the guarantee period.

The Company engages subcontractors to carry out work related to the implementation of building contracts. The invoiced costs related to subcontractors' employment are recognized as "Trade payables and other liabilities" (Note 6.2) The Group retains a portion of payments to subcontractors in relation to the performance bond, and recognizes it the line "Building contract liabilities - bid bonds". The breakdown of revenues into revenues recognized in time and items recognized at point of time is presented in Note 4.1.

In connection with the execution of building contracts and the difference in time of revenues and expenses recognition for accounting and tax purposes, the deferred income tax assets and liabilities are recognized in the statement of financial position - see Note 4.3.

The application of the performance-based method to the recognition of revenue and expenses under construction contracts requires estimation of the progress rate of works performed under a certain contract, i.e. the quantity survey of work performed as of the balancing date.

The physical quantity survey, used to determine the progress in contract performance, is taken by the construction site personnel. The quantity survey is carried out separately for each scope of works, i.e. elements or stages of the contract underway, according to the measures assigned to them (mainly m^2, kg and pcs.).

The Company has adequate control processes in place to ensure that the calculation of actual project outcome is based on current and reliable estimates of the quantity survey, subject to verification and approval by designated persons. The quantity survey made by construction site personnel is subject to verification by the branch manager responsible for the construction site, and then additionally by the Company's internal audit department.

The Company keeps track of projects being implemented - construction contracts in the internal system used for project management. Information concerning certain contract, its progress rate, is entered into the system by the Contract/Site Manager and then approved by the Branch Manager responsible for the construction site. The budgets of individual contracts are subject to the formalized updating process during the year, based on current information, and are approved by the Management Board. If between official budget revisions there are events that have material impact on contract performance, the value of total revenues or contract costs is updated on an ongoing basis, i.e. changes in the scope of the contract are reflected in the Company's internal system immediately after they are negotiated by the Company with the customer.

2. BUILDING CONTRACTS

2.1. INCOME AND EXPENSES UNDER BUILDING CONTRACTS

3. CAPITAL MANAGEMENT AND DEBT

3.1. CAPITAL MANAGEMENT

Share capital comprises common stock and is carried at the nominal value (in adherence to the Articles of Association of the Company and an entry made into the National Court Register).

Share premium is the amount equal to the surplus of price for acquisition of shares in Company above their par value. It is recognised in the line "Share premium reserve capital".

Other supplementary capitals are set up mainly from retained earnings including amounts obligatorily appropriated to the reserve capital in accordance with the requirements of the Commercial Companies Code.

Reserve capitals are created from retained earnings for the purposes indicated in the Articles of Association.

The Company's supplementary capital is set up in accordance with the provisions of the Polish Commercial Companies Code and the decisions of the shareholders. Pursuant to the Commercial Companies Code, a supplementary capital should be set up to cover losses, that should account for at least 8% of the profit for a certain accounting year, until the supplementary capital reaches at least one third of the share capital. the supplementary capital set up in this manner is not subject to distribution. The General Meeting of Shareholders decides on the use of the supplementary and reserve capital, however, a part of the supplementary capital may be used only to cover the loss reported in the financial statements and is not subject to distribution into other purposes.

The Company manages its capital structure and in parallel to the changes in economic environment, it modifies its capital structure. In order to maintain or adjust the capital structure, the Company may manage appropriately the dividend payment to shareholders or issue to new shares.

The main objective of the Company's capital management is to maintain a good credit rating and safe equity ratios in order to support the Company's operations and increase shareholders' value. The ratios are presented below.

Share capital

Shareholder	No. of shares	% shareholding in share capital
Wolff & Muller Holding GmbH & Co.KG	4,012,025	31.31%

The Company's Articles of Association do not grant the shareholders, referred to hereinabove, any personal rights vis-a-vis Erbud S.A., and in particular do not grant the right to appoint members of Erbud's Management or Supervisory Boards.

The number of shares making up the approved capital equals to the number of shares issued. The par value per share for all share series is PLN 0.10. No shares were reserved for the purposes of the issue related to the exercise of put options. All issued shares are ordinary non-preference shares. There are no limitations on rights to shares or limitations on share transferability.

3.2. CREDIT AND LOAN LIABILITIES

Credit and loan liabilities are initially recognized at fair value less transaction costs. At each balancing date, credits and loans are priced at amortized cost using effective interest rate.

	30 Sept. 2020	31 Dec. 2019
Long-term		
Bank loans	-	-
Short-term		
Overdraft facilities	625	30,566
Loans	22,898	7,793
	23,523	38,359
Total credit and loan liabilities	**23,523**	**38,359**

3.3. DEBT RELATED TO ISSUED BONDS

Liabilities related to issued bonds are initially recognized at fair value less transaction costs. At each balancing date, the issued bond liabilities are priced at amortized cost using effective interest rate.

As of balance sheet date, the Company had the following outstanding debt in relation to issued bonds posted into long-term liabilities:

Issue date	Type of issued bonds	Currency (specify whether functional or foreign currency)	Interest rate	Maturity date	Purpose of financing	Par value of shares		30 Sept. 2020	31 Dec. 2019
27 Sept. 2017	C series bearer shares, dematerialized, unsecured	functional	WIBOR 6 M + 3% margin	27 September 2021	financing of an increased working capital requirement	1		52,000	52,000
			Total short and long-term liabilities			1		**52,000**	**52,000**
			Liabilities due to accrued interest disclosed under "Trade liabilities and other liabilities".			-		-	-

3.4. LEASE LIABILITIES

Period		30 Sept. 2020 Nominal value of minimum payments	31 Dec. 2019 Nominal value of minimum payments
Below 1 year	Short-term	4,849	4,782
1 - 5 years	Long-term	5,874	8,438
		10,723	**13,220**
Lease financial costs		231	129
Present value of minimum payments		**10,492**	**13,091**

In the line "Long-Term Liabilities", the Company recognized liabilities under lease and tenancy contracts pursuant to IFRS 16 "Leases" standard in the amount of PLN 2,223 thousand, whereas in the short-term liabilities in the amount of PLN 2,827 thousand.

4. EXPLANATORY NOTES TO THE STATEMENT OF COMPREHENSIVE INCOME

4.1. ACCOUNTING SEGMENTS

Based on the management accounting presented to the main operational decision-maker (i.e. the Management Board of the Parent Company), the Company identified four basic accounting segments:

- residential/commercial buildings at home,
- residential/commercial buildings in foreign countries,
  industrial construction at home,
- other segments.

The operations were broken down into individual segments by classifying the significance of operations into the segment. Such a division corresponds to the distribution of the main risks and returns on expenses incurred.

The financial data prepared for the purposes of management reporting, which is the basis for data on reportable segments, follows the same accounting principles as those applied to the preparation of the Group's Separate Financial Statements.

The Management Board analyses the segment results using Key Performance Indicators (KPIs) such as EBIT, EBIT and EBITDA margin. It should be borne in mind that these are not KPIs defined in IFRS and they do not represent standardized measures, therefore their calculation methods may differ from one entity to another in the market. The Company defines EBIT as gross profit increased by financial costs less financial revenues. The EBIT margin is defined as the ratio of EBIT to sales revenues expressed as a percentage. EBITDA is defined as EBIT increased by depreciation in the period.

4. EXPLANATORY NOTES TO THE STATEMENT OF COMPREHENSIVE INCOME

Reporting segment	Description of segment operations	Operational segments aggregated in the reporting segment	Reasons for aggregation of operational segments into reporting segments
Domestic building construction	Construction of residential buildings, office and public utility buildings in Poland	A segment is an allocated part of the Company's activities related to the agency in entering into contracts executed on the basis of specifically identifiable, actually generated revenues and incurred expenses assigned to a certain segment.	The operating segments were aggregated based on similarity: - long-term average gross margins; - similarities between the products and services offered by the companies, - manufacturing processes, - distribution methods - types of customers.
Residential/commercial buildings in foreign countries,	Construction of residential, office and public buildings in foreign countries (mainly in Germany and Belgium)	A segment is an allocated part of the Company's activities related to the agency in entering into contracts executed on the basis of specifically identifiable, actually generated revenues and incurred expenses assigned to a certain segment.	No data aggregation.
Industrial construction at home,	Implementation of industrial projects in the broadly understood industry	A segment is an allocated part of the Company's activities related to the agency in entering into contracts executed on the basis of specifically identifiable, actually generated revenues and incurred expenses assigned to a certain segment.	No data aggregation.
Other segment	Widely understood support services	A certain portion of the Parent Company Erbud S.A.'s operations is allocated to the segment.	No data aggregation.

Manufacturing costs of products sold	**804,648**	**1,142,159**	**240,673**	**310,901**

4.3. TAXATION

The mandatory burdening of the financial result consists of two elements: current income tax and deferred tax.

Due to temporary differences between the value of assets and liabilities shown in the accounting books and their tax value and the tax loss deductible in the future, the Company, using the balance sheet method, sets up: deferred income tax liabilities in respect of positive temporary differences and determines deferred tax assets in respect of foreign exchange losses and tax losses, which can be deducted following the prudential principle.

Deferred income tax assets and liabilities are not recognized in the case of temporary differences arising upon initial recognition of an asset or liability in a transaction that is not a business combination and in case of transactions that have no impact on either the accounting or tax result.

Deferred tax assets and liabilities are offset if there is a legal right to set-off tax liabilities and current tax liabilities, and if the deferred tax concerns a tax imposed by the same tax authority on the same taxpayer. It implies that deferred income tax assets and liabilities are compensated.

The Company recognises deferred tax asset based on the assumption that in the future profit will be generated for tax purposes that will allow to realise the asset.

The balance sheet value of an deferred tax asset is verified at each balancing date and is reduced accordingly by as much as it probability dropped to reach taxable income sufficient for partial or total realisation of the deferred tax asset.

	For a 9-month-period, ended on 30 September 2020	For a 9-month-period, ended on 30 September 2019
Gross profit /loss before tax on continued activities	**23,638**	**21,239**
Tax according to the statutory tax rate applicable in Poland - 19%	**4,491**	**4,035**

	Post set off balance	**20,404**	**-**	**-**	**16,167**	**-**	**-**	**14,657**
	Assets	20,404	-	-	16,167	-	-	14,657
	Liabilities	-			-			-
	Net impact of changes in the period		**(4,294)**	**57**		**(1,510)**	**-**	

In the year ended on 30 September 2020 and 31 December 2019 there were no negative temporary differences on which no deferred tax assets were recognised.

Information about income tax receivables and liabilities figures is presented in Note 4.3.

5. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

5.1. FINANCIAL ASSETS AND LIABILITIES

Since 1 January 2018, the Company has classified financial instruments, pursuant to IFRS 9, into the following categories:

- Assets priced at amortized cost;
- Financial assets priced at fair value through financial profit or loss;
- Financial liabilities priced at amortized cost;
- Derivative instruments determined as hedging instruments in hedge accounting.

Financial assets priced at amortized cost include primarily:

Note 5.1.1.	Financial Assets - Loans Extended
	Receivables under building contracts - bid bonds
Note 6.1.	Trade receivables and other receivables
Note 2.2.	Receivables under building contracts - pricing
	Cash and cash equivalents

Financial liabilities priced at amortized cost comprise mainly:

	Building contract liabilities - bid bonds
Note 2.2.	Building contract liabilities - pricing
Note 6.2.	Trade payables and other liabilities
Notes 3.2. – 3.4.	Debt

:

5.1.1. FINANCIAL ASSETS – LOANS EXTENDED

Debt instruments held to collect contractual cash flows that comprise solely payment of principal and interest ('SPPI') are priced at amortized cost. Interest income is measured using the effective interest rate method and disclosed under "Interest income" in the financial profit or loss. Impairment losses are recognised in compliance with the accounting policy indicated and presented in the Section titled "Impairment losses on financial assets".

The value of financial assets is updated by an impairment loss calculated using the expected credit loss method pursuant to IFRS 9 standard.

No impairment losses were recognised for the loans granted. Loans are not overdue as of the balance sheet date. Loans granted are burdened with credit risk and interest rate risk, which are described respectively.

5.2. FINANCIAL RISK MANAGEMENT PRINCIPLES

While running its operations, the Company is exposed to the following significant types of financial risk: market risk (including currency risk, interest rate risk), credit risk and liquidity risk. The Company's Management Board is responsible for determining the rules for the management of such risks and for verifying them.

5.2.1. MARKET RISK – CURRENCY RISK

While performing its core operations, the Company enters into building contracts that are denominated in EUR. The currency risk management policy adopted by the Management Board consists in adjusting the contract currency to the currency of expenses connected with such contract. The contracts executed are mostly concluded by the Company in Polish currency (PLN), while contracts executed abroad are concluded in EUR.

With regard to receivables and liabilities resulting under concluded building contracts that will be paid for in EUR and with reference to loans denominated in EUR, the Group applies forward contract hedging for EUR currency as part of hedge accounting.

5.2.2. MARKET RISK – INTEREST RATE RISK

The interest rate risk occurs mainly in connection with debt financing, i.e. bank credits and loans, issued bonds and financial lease products, used by the Company.

In addition, the Company invests idle cash partly in investments with a variable interest rate (deposits) and extends mainly variable interest rate loans.

Assets and liabilities bearing interest at variable interest rates expose the Company to the risk of cash flow volatility. Meanwhile assets and liabilities bearing fixed rate exposes Erbud to the risk of fair value volatility, however, owing to the fact that the Company does not measure these items at fair value, this impact is not reflected in the financial statements.

The Company monitors the exposure to interest rate risk and makes prepares interest rate forecasts.

5.2.3. CREDIT RISK

Cash and cash equivalents

Erbud minimizes credit risk related to cash and cash equivalents through diversification of banks with which investment transactions are made. The Company cooperates with highly renowned financial institutions, in accordance with the table below, without causing a significant concentration of credit risk.

Trade receivables and receivables under construction contracts

To protect against credit risk resulting from receivables under construction contracts (i.e. trade receivables, receivables under building contracts - bid bonds and valuation of construction contracts), the Company has in place a policy of assessing and verifying credit risk related to all contracts, both at the offering phase and during contract execution. Before signing a contract, each counterparty is evaluated in terms of its ability to meet its financial obligations. In the event of a negative assessment of the counterparty's payment capability, entering into the contract depends on the establishment of adequate financial or asset collaterals. Moreover, contracts with investors contain clauses providing for the right to suspend the execution of works, if there is a delay in the transfer of payments for services rendered. If possible contractual clauses are also developed to condition payments to subcontractors on the receipt of funds from the investor.

The Company has no credit risk concentration in relation to trade receivables and receivables under building contracts - in relation to bid bonds and valuation of building contracts.

Changes in the write-down of receivables are presented in the Note 6.1.

5.2.4. LIQUIDITY RISK

In order to reduce the risk of liquidity loss, the Company maintains an appropriate amount of cash and transferable securities as well as enters into credit line agreements, which serve as additional liquidity security. To finance investment purchases, the Company uses own funds or long-term financial lease contracts, ensuring adequate sustainability of the financing structure for this type of assets.

The Company pursues a policy limiting credit exposures to individual financial institutions and issuers of debt securities, which are acquired as part of periodic investments of surplus cash.

Liquidity management is supported by the existing liquidity forecast reporting system by the Company.

6. OTHER NOTES

6.1. TRADE RECEIVABLES AND OTHER RECEIVABLES

In the trade receivables as well as other receivables category Erbud recognised mainly trade receivables from non-related entities (mainly due to issued invoices in relation to the construction contracts executed by the Company) and budget receivables, including corporate income tax receivables and tax on goods and services receivables.

Receivables due to deliveries and services, whose maturity is usually from 30 to 180 days, are recognized at their nominal value, i.e. according to the amounts originally invoiced. As of the balance sheet date, these items are carried at amortized cost, including any revaluation write-off.

IFRS 9 requires the estimation of expected loss for trade receivables, regardless of whether there is any indication of impairment or not. For trade receivables which, on the basis of a portfolio analysis, were assessed as not impaired, the estimation of possible revaluation write-downs is based on the use of a write-down matrix based on historical data adjusted for the impact of future factors. For trade receivables with indications of impairment (e.g. disputed receivables), specific additional write-downs were set up depending on the assessment of their recoverability.

If the value of money in time is material, the value of receivables is determined through discounting projected future cash flows to the present value, using a gross discount rate reflecting current market-based appraisals of time value of money. If the discounting method has been applied, the increase of receivables caused by time elapse is posted as financial gains.

	30 Sept. 2020			31 Dec. 2019		
	Gross value	Write-down	Net value	Gross value	Write-down	Net value
Trade receivables from non-related entities	234,373	23,164	211,209	293,826	24,143	269,683
Receivables from corporate income tax	-	-	-	8,039	-	8,039
Other budget receivables	13,410	-	13,410	5,776	-	5,776

Total	**269,211**	**24,374**	**244,837**	**329,042**	**25,353**	**303,689**

Changes in the write-down of receivables are presented in the table below.

	For a 9-month-period, ended on 30 September 2020	For a 12-month-period, ended on 31 Dec. 2019
Opening balance of write-downs	**25,353**	**25,425**
Setting up	777	2,686
Reversal	1,756	2,758
Closing balance of write-downs	**24,374**	**25,353**

6.2. TRADE PAYABLES, OTHER LIABILITIES

Trade payables and other liabilities include primarily trade payables to non-related parties, advances received, payroll liabilities and tax liabilities.

Trade payables are initially carried at fair value (corresponding to the nominal value) and as of the balance sheet date they are priced at amortized cost.

The received advance payments refer mainly to payments from contractors for the performance of construction contracts and are recognized at the nominal value of the payment received.

Wage and salary payables are recognized at the value due for the work performed, calculated in accordance with the concluded contracts.

Tax liabilities (including tax on goods and services, corporate income tax, personal income tax) are recognized at the amount requiring payment by the Group in compliance with the effective and applicable legislation.

	30 Sept. 2020	31 Dec. 2019
Trade payables	**102,203**	**161,410**

Change in balance of prepayments and accruals	**29,648**	(19,999)
Change in balance of working capital	**43,129**	**(133,704)**

6.4. GROUP STRUCTURE AND INVESTMENTS INTO JOINT VENTURES AND TRANSACTIONS WITH RELATED ENTITIES

Interests and shares in subsidiaries and jointly controlled entities

Interests and shares in subsidiaries and jointly controlled entities are recognized at historical cost less possible impairment losses.

Non-financial fixed assets impairment

As at every balancing date, the Company verifies whether there are any circumstances indicating impairment of any item of the assets. When such circumstances have been identified or when an annual impairment test needs to be carried out, the Company's estimates the recoverable value of a given asset.

The recoverable amount of an asset corresponds to the fair value of that asset or cash-generating centre less selling costs or its value in use, whichever is higher. This value is determined for individual assets, unless a certain asset does not generate cash inflows on its own, which are mostly independent from those generated by other assets or asset categories. If the carrying amount of an asset in the balance sheet is higher than its recoverable amount, impairment occurs and a write-down it made up to the determined recoverable amount.

For the estimation of the value in use, the projected cash flows are discounted to their present value using a discount rate before taxation that reflects current market estimation of the time value of money and the risk typical for a given asset. Impairment losses on non-financial assets used in operations are recognised as Other Expenses.

As at each day ending the accounting period, the Company assesses whether there is any evidence that an impairment loss recognised in prior periods for a certain asset is unnecessary or should be reduced. If such evidence exists, the Company estimates the recoverable amount of the asset. Previously posted write-down is

6.5. POST-ACCOUNTING PERIOD EVENTS

On 4 September 2020 the Extraordinary General Meeting of Shareholders of ERBUD S.A. is to adopt Resolution No. 5/2020 on the reduction of the Issuer's share capital from PLN 1,281,185.90 to PLN 1,239,935.90 i.e. by PLN 41,250. The redemption of shares shall be performed through the reduction of Company's share capital.

Until the Report's publication date, the share capital reduction was not registered by the Court.

Other important information, which in the Issuer's opinion have an impact on the future performance of the Group.

The occurrence of uncertain and unpredictable circumstances, including the outbreak of SARS-CoV-2 pandemic with associated consequences of declaring an epidemic emergency status, may in short- and long-term have a negative impact on the ERBUD Group's business, development prospects and financial standing. The important areas, which the Company monitors on an ongoing basis and which may pose the greatest risk to the future performance of the ERBUD Group are as follows: (i) temporary absence of construction staff, which may contribute to the delay of construction processes, (ii) delays in the supply of construction materials and services, (iii) slowdown in the activities of public administration bodies, including in particular administrative decision-making process, (iv) contracting authorities' decisions to suspend work on individual construction contracts, (v) contracting authorities' decisions not to implement planned construction projects, e.g. due to difficulties in raising financing.

In the opinion of the Management Board of the ERBUD Group, as of the publication date of the financial statements, drawn up as of 30 September 2020, the liquidity positions of the Group and the Company remain stable.

As the pandemic-related developments continues to evolve, management of the company believes that it is not possible to provide quantitative estimates of the potential impact of the current situation on the company. The management will continue to monitor the potential impact and will take all possible steps to mitigate any negative impact on the ERBUD Group.

In the opinion of the Management Board of the ERBUD Group, the greatest threat of the pandemic to the construction sector will be the slowdown of private investments. Investors are already encountering major problems in raising funding for new investment projects. Today it is not known whether it is feasible to bridge the gap with public investments.

Signatures of all Management Board members:

Dariusz Grzeszczak
/A Management Board Member/

Jacek Leczkowski
